

YOGESH ARORA

FRONTEND ENGINEER

Jalandhar, Punjab, India | +91 84375 79399 | yogesharora207@gmail.com | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 1.5+ years of production experience building performant, scalable interfaces with Next.js 14 and React. Specialized in the Next.js ecosystem (App Router, Server Components, TypeScript), component-driven UI architecture, and state management with Redux and Zustand. Proven track record of measurable performance gains, including a 60% load time improvement and 35% bundle size reduction on a production platform serving 500+ monthly active users. Comfortable owning frontend architecture end to end, from responsive, cross-device layouts to reusable design systems.

TECHNICAL SKILLS

Frontend: Next.js 14 (App Router, Server Components), React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, Material UI, GSAP, HTML5, CSS3

State Management: Redux, Zustand

UI Engineering: Responsive & Cross-Device Design, Reusable Component Libraries, Design Systems, Performance Optimization (Code Splitting, Lazy Loading, Tree Shaking, CDN Optimization)

Backend & Database: Node.js, Express.js, RESTful APIs, Socket.IO, JWT, Redis, MongoDB (Aggregation Pipelines, Indexing, Schema Design)

Mobile: Flutter, Dart (cross-platform UI, REST integration, basic state management)

AI/ML Integration: Python (working knowledge), LangChain, OpenAI API, Chatbot Architecture, Prompt Engineering, RAG Concepts

AI Dev Tools: GitHub Copilot, Cursor AI, Claude, ChatGPT, v0 by Vercel

Testing & Tools: Playwright (E2E), Agile/Scrum, Git, GitHub, Postman, VS Code, Render

PROFESSIONAL EXPERIENCE

Software Developer

Nov 2024 - Present

Xploresense Pvt. Ltd. | Remote | Ed-Tech SaaS Full Stack (Next.js / Node.js / MongoDB)

- Led full migration of a 3-year-old React codebase to Next.js 14 with TypeScript, delivering a 60% improvement in load time and 35% reduction in bundle size via code splitting, lazy loading, and tree shaking.
- Built a reusable UI component library with shadcn/ui and Material UI, standardizing design and responsive layouts across three portals (Admin, Parent, Teacher) and accelerating feature delivery.
- Architected a school management SaaS platform frontend from the ground up, supporting 500+ monthly active users across three role-based portals (Admin, Parent, Teacher), reducing administrative workload by 40%.
- Implemented state management with Redux and Zustand across multi-role dashboards, and contributed to a companion Flutter mobile module for parent-side notifications and attendance views.
- Enforced multi-role auth architecture (Admin/Parent/Teacher), reducing bug reports by 30%; integrated AI-assisted tools (Copilot, Cursor, Claude) into the workflow, cutting boilerplate time by an estimated 30%.
- Collaborated in Agile sprints with daily standups and code reviews, maintaining 90%+ Playwright E2E test coverage on critical user flows.

PROJECTS

School Management SaaS — Production Project

Next.js 14 · TypeScript · Redux · Node.js · MongoDB · shadcn/ui · Material UI · Flutter · Playwright

- Built and maintained a multi-role, responsive frontend across Admin, Parent, and Teacher portals, covering attendance, fee management, student information, academic workflows, and role-specific dashboards.
- Modernized the platform from legacy React to Next.js 14 + TypeScript, implementing reusable UI patterns, optimized data fetching, and critical-flow E2E testing.

Gym Management SaaS

Next.js · TypeScript · Redux · Node.js · MongoDB · REST APIs · Multi-Tenant Architecture

- Developing a production-ready multi-tenant SaaS frontend for small and medium-sized gyms to manage members, membership plans, attendance, payments, weight tracking, expiries/renewals, and reports.
- Designed responsive Super Admin and Gym Admin dashboards with protected routes, secure sessions/cookies, and strict tenant isolation using gymId.

EDUCATION

Bachelor of Arts

Khalsa College, Jalandhar, Punjab, 2019 - 2022

- Self-directed training in Computer Science fundamentals, Data Structures & Algorithms, and full-stack web development alongside formal studies.
