

YOGESH ARORA

Jalandhar, Punjab, India | +91 84375 79399 | yogesharora207@gmail.com | github.com/Yogesharoradev | yuviarora.netlify.app

PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years of production experience building scalable SaaS platforms in the ed-tech sector. Specialized in the Next.js ecosystem (App Router, Server Components, TypeScript) and the MERN stack, with working exposure to Flutter for cross-platform mobile features. Actively expanding into AI/LLM integration using Python, LangChain, and OpenAI APIs to build chatbot and agentic features. Skilled at modernizing legacy codebases, architecting multi-role systems, and leveraging AI-assisted development tools to ship high-performance applications faster.

TECHNICAL SKILLS

Frontend: Next.js 14, React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, Material UI, GSAP, HTML5, CSS3

Backend & Database: Node.js, Express.js, RESTful APIs, Socket.IO, JWT, Redis, MongoDB (Aggregation Pipelines, Indexing, Schema Design)

Mobile: Flutter, Dart (cross-platform UI, REST integration, basic state management)

AI/ML Integration: Python (working knowledge), LangChain, OpenAI API, Chatbot Architecture, Prompt Engineering, RAG Concepts

AI Dev Tools: GitHub Copilot, Cursor AI, Claude, ChatGPT, v0 by Vercel

Testing & Tools: Playwright (E2E), Agile/Scrum, Git, GitHub, Postman, VS Code, Render, CDN Optimization

PROFESSIONAL EXPERIENCE

Software Developer Nov 2024 – Present

Xploresense Pvt. Ltd. | Remote | Ed-Tech SaaS Full Stack (Next.js / Node.js / MongoDB)

- Architected a school management SaaS platform from the ground up supporting 500+ monthly active users across three portals (admin, parent, teacher), reducing administrative workload by 40% through automated attendance and fee tracking.
- Led full migration of a 3-year-old React codebase to Next.js 14 with TypeScript, delivering a 60% improvement in load time and 35% reduction in bundle size via code splitting, lazy loading, and tree shaking.
- Optimized MongoDB queries through targeted indexing and aggregation pipeline refactoring, cutting server response time by 25%; enforced multi-role auth architecture (Admin/Parent/Teacher) that reduced bug reports by 30%.
- Built a reusable UI component library with shadcn/ui and Material UI, standardizing design across three portals and accelerating feature delivery.
- Contributed to a companion Flutter mobile module for parent-side notifications and attendance views, integrating REST endpoints and ensuring cross-platform UI consistency.
- Integrated AI-assisted tools (Copilot, Cursor, Claude) into the team workflow, cutting boilerplate and refactoring time by an estimated 30% while maintaining code quality standards.
- Collaborated in Agile sprints with daily standups and code reviews, maintaining 90%+ Playwright E2E test coverage on critical user flows.

PROJECTS

School Management SaaS — Production Project

Next.js 14 • TypeScript • Node.js • MongoDB • shadcn/ui • Material UI • Flutter • Playwright

- Built and maintained a multi-role school management platform used across Admin, Parent, and Teacher portals, covering attendance, fee management, student information, academic workflows, and role-specific dashboards.
- Modernized the platform from legacy React to Next.js 14 + TypeScript and implemented reusable UI patterns, server-side authorization, optimized data fetching, and critical-flow E2E testing.

Gym Management SaaS

Next.js • TypeScript • Node.js • MongoDB • REST APIs • Multi-Tenant Architecture

- Developing a production-ready multi-tenant SaaS for small and medium-sized gyms to manage members, membership plans, attendance, payments, weight tracking, expiries/renewals, reports, and WhatsApp announcements.
- Designed Super Admin and Gym Admin roles with protected routes, secure sessions/cookies, password hashing, server-side authorization, and strict tenant isolation using gymId.
- Repository: github.com/Yogesharoradev/gym-management-saas

EDUCATION

Bachelor of Arts 2019 – 2022

Khalsa College, Jalandhar, Punjab

- Self-directed training in Computer Science fundamentals, Data Structures & Algorithms, and full-stack Web Development alongside formal studies; built production projects demonstrating hands-on engineering skills.
